1. Platform Overview

The Identity and Access Management (IAM) Platform is the official digital system used by Homs Governorate to manage employee accounts and their access to government software systems.

Through this platform, every employee is assigned a role that determines which systems they can use and what actions they can perform. Employees can also request additional access, track the status of their requests, and manage their own profile — all in one place.

What the platform allows you to do:

- Log in securely using your official government email.
- View the systems and permissions currently assigned to your account.
- Request access to a new system or permission level.
- Track the approval status of your pending requests.
- Update your personal profile and reset your password.
- Contractors: view your contract details and request an extension.

INFO All employee accounts use the official email domain @homs.gov.sy. This is your username when logging in.

2. Getting Started — How to Log In

Step-by-step login instructions:

Step 1 — Open the platform

Go to <https://iam.homs.gov.sy> in your web browser (Chrome or Firefox recommended).

Step 2 — Enter your email

Type your official government email address. Format: `firstname.lastname@homs.gov.sy`

Example: `ahmed.khaled@homs.gov.sy`

Step 3 — Enter your password

Type your password. Passwords are case-sensitive. If you have forgotten your password, click "Forgot Password" or contact your IT administrator.

Step 4 — Click Login

Press the Login button. You will be redirected to the Dashboard.

NOTE Demo Mode: On the login page there is a "Demo Login" button. Clicking it will log you in as the System Owner account for testing purposes. You can also select any specific user from a dropdown to preview their permissions.

What happens after login:

You will land on the Dashboard. The left sidebar shows only the pages your role is permitted to access — this is normal. Different employees see different menu items based on their role.

Your Role	Pages You Will See in the Menu
System Owner	All pages (full access)
IT Admin	Dashboard, Users, Roles, Org Structure, Audit Log, Workflows, Contractors, Settings
Security Officer	Dashboard, Roles, Audit Log, Workflows
Internal Auditor	Dashboard, Audit Log
Senior Manager	Dashboard, Users, Org Structure, Workflows, Contractors
Department Manager	Dashboard, Org Structure, Workflows, Self-Service
HR Employee	Dashboard, Users, Org Structure, Workflows, Contractors, Self-Service
Regular Employee	Dashboard, Self-Service, Profile
Contractor	Dashboard, Self-Service, Profile

Logging out:

Click on your name/avatar in the bottom-left corner of the sidebar, then click the Logout icon (door with arrow). Always log out when using a shared computer.

TIP Your session is saved automatically. If you close the browser and reopen it, you will still be logged in — until you manually log out.

3. Understanding Your Role

Every user on the platform is assigned exactly one role. Your role determines what you can see and what actions you can take. There are 9 roles in the platform, ranging from full system control to basic self-service access.

Role Name	Arabic Name	Short Description	Who holds it
System Owner	المالك النظامي	Full, unrestricted access to everything	Head of IT / Platform Administrator
IT Admin	مدير النظام مدير المستخدمين	Manage users, roles, systems, and settings	IT Department staff
Security Officer	مدير الأمان مدير الصلاحيات	Monitor security, review audit logs, revoke permissions	Information Security team
Internal Auditor	مراقب داخلي	Read-only access for auditing and compliance	Finance / Audit department

Role Name	Arabic Name	Short Description	Who holds it
Senior Manager	مدير عام	Approve strategic requests, manage contractors	Directorate managers
Department Manager	مدير قسم	Approve requests within their department	Section/department heads
HR Employee	موظف موارد بشرية	Create and manage employee accounts	Human Resources staff
Regular Employee	موظف عام	Self-service only: request access, update profile	General government staff
Contractor	مقاول	Limited access tied to a contract expiry date	External contractors

HOW TO CHECK YOUR ROLE Not sure what your role is? Log in and look at the bottom of the sidebar — your name and role label are displayed there. You can also go to Profile to see your full account details.

4. Role-by-Role Guide

This section explains what each role can and cannot do on the platform. Find your role to understand your capabilities.

Regular Employee (موظف عام)

The most common role. Regular employees use the self-service portal to manage their access needs.

Can do:

- ☐ Log in to the platform
- ☐ View your current system access
- ☐ Submit a request for new system access
- ☐ Track status of your submitted requests
- ☐ Resubmit a rejected request
- ☐ Update your personal profile
- ☐ Reset your own password

Cannot do:

- ☐ View other employees' accounts
- ☐ Approve or reject requests
- ☐ Access audit logs
- ☐ Modify roles or permissions
- ☐ Access the Users or Roles management pages

Contractor (□□□□□□ □□□□)

Temporary external staff with time-limited access. Contract expiry is tracked automatically.

Can do:

- ☐ Log in to the platform
- ☐ View your contract details and expiry date
- ☐ See how many days remain on your contract
- ☐ Submit a contract extension request
- ☐ Update your personal profile
- ☐ Reset your password

Cannot do:

- ☐ Access systems beyond what is specified in your contract
- ☐ View other employees' data
- ☐ Approve any requests
- ☐ Access after contract expiry (account auto-suspended)

Department Manager (□□□□ □□□□□)

Manages their department's access requests. First level of approval for most requests.

Can do:

- ☐ Approve or reject access requests from department employees
- ☐ Create new workflow requests
- ☐ View organizational structure
- ☐ Submit their own access requests (self-service)
- ☐ Delegate a request to another manager

Cannot do:

- ☐ Create or delete user accounts (HR does this)
- ☐ Modify roles or system-wide permissions
- ☐ Access audit logs
- ☐ Extend contractor contracts (Senior Manager does this)

Senior Manager (□□□□□□ □□□□□□)

Handles strategic approvals and oversees contractors. Second level of approval for critical requests.

Can do:

- ☐ Approve or reject high-level access requests
- ☐ Extend contractor contracts
- ☐ View all contractors and their status
- ☐ Manage organizational structure
- ☐ Export reports

Cannot do:

- ☐ Create/delete user accounts directly
- ☐ Modify system roles or permissions
- ☐ Access the Audit Log
- ☐ Change system settings

HR Employee (👤👤👤👤 👤👤👤👤👤👤👤👤👤👤)

Responsible for the lifecycle of employee accounts — onboarding, updates, and offboarding.

Can do:

- ☐ Create new user accounts for new employees
- ☐ Edit employee information (name, department, unit)
- ☐ Export user lists
- ☐ View contractor information
- ☐ Submit workflow requests
- ☐ Use self-service for own access needs

Cannot do:

- ☐ Assign or change roles (IT Admin does this)
- ☐ Grant or revoke specific permissions
- ☐ Access the Audit Log
- ☐ Approve workflow requests directly

Internal Auditor (👤👤👤👤👤👤👤👤👤👤)

Read-only observer. Can see everything but cannot change anything. Used for compliance checks.

Can do:

- ☐ View and search all audit logs
- ☐ Export audit reports (CSV / Excel)
- ☐ View user accounts (read-only)
- ☐ View all workflow requests (read-only)
- ☐ View contractor information
- ☐ Export reports

Cannot do:

- ☐ Edit any user, role, or permission
- ☐ Approve or reject requests
- ☐ Create new accounts
- ☐ Change any settings

Security Officer (👤👤👤👤👤👤👤👤👤👤👤👤👤👤👤👤)

Monitors security events, manages incidents, and can suspend suspicious accounts.

Can do:

- ☐ View and export audit logs (all activity)
- ☐ Suspend user accounts flagged as risky
- ☐ Revoke permissions from any user
- ☐ Review and approve/reject workflow requests
- ☐ Monitor failed logins and suspicious IPs

Cannot do:

- ☐ Create new user accounts
- ☐ Change system settings
- ☐ Grant new permissions (only revoke)
- ☐ Manage contractors

IT Admin (👤👤👤👤👤👤👤👤👤👤)

Full technical control over the platform. Second most powerful role after System Owner.

Can do:

- ☐ Create, edit, suspend, and delete users
- ☐ Assign and modify roles
- ☐ Grant or revoke any permission
- ☐ Manage all 10 integrated government systems
- ☐ Configure platform settings (LDAP, password policies)
- ☐ View and export audit logs
- ☐ Manage contractors
- ☐ Approve or reject workflow requests

Cannot do:

- ☐ No significant restrictions (same as System Owner except cannot delete System Owner accounts)

System Owner (👤👤👤👤👤👤)

The highest authority on the platform. Full, unrestricted access to all features.

Can do:

- ☐ All actions on the platform without any restriction
- ☐ Override any role restriction
- ☐ Access every page and feature
- ☐ Final approval authority for all requests

Cannot do:

- ☐ No restrictions — this role bypasses all access checks

5. Navigating the Platform

The platform is divided into clearly labeled sections accessible from the left sidebar. Here is what each section does:

Dashboard (/dashboard)

The home page after login. Shows key statistics: total users, active users, pending requests, number of roles, and connected systems. Also displays a monthly login chart and a breakdown of users by role. Visible to all roles.

User Management (/users)

A searchable, filterable table of all employee accounts. From here you can create a new user, edit user details, suspend an account, or view a profile. Available to: System Owner, IT Admin, HR Employee, Senior Manager.

User Details (/users/:id)

A detailed profile page for any user. Contains 4 tabs: (1) Current Permissions — lists all systems and permissions assigned. (2) Activity Log — shows recent actions by this user. (3) Permission History — shows when permissions were granted or revoked. (4) Sponsor Info — only visible for Contractor accounts.

Roles & Permissions (/roles)

Displays all 9 platform roles with their assigned permissions. IT Admins can create custom roles or modify existing ones. Available to: System Owner, IT Admin, Security Officer.

Org Structure (/organizations)

A tree view of the governorate's administrative hierarchy: Governorate → Directorate → Department → Unit. You can browse each level and see which employees belong to each unit.

Audit Log (/audit)

A complete, read-only record of all platform activity. Records include: logins, logouts, account creation, permission changes, access approvals/rejections. Supports filtering by date, user, action type, and status. Can be exported as CSV or Excel. Available to: System Owner, Internal Auditor, Security Officer.

Approval Requests (/workflows)

All pending, approved, and rejected requests appear here. Managers see requests that need their approval. Request types: Access Request, Role Change, Contract Extension. Each request may need approval from 1-2 people before it is completed.

Self-Service (/self-service)

The employee's personal portal. From here you can: view your current system access, submit a new access request, track your submitted requests, and resubmit a rejected request. Contractors also see their contract details and expiry countdown here.

Contractors (/contractors)

A dedicated management page for external contractors. Shows contract start date, expiry date, sponsor, and linked systems. Color-coded alerts: amber = expires within 30 days, red = expires within 7 days. Available to: System Owner, IT Admin, HR Employee.

Settings (/settings)

Platform-wide configuration. Includes LDAP/Active Directory settings, password policies, notification rules, and security settings. Available to: System Owner, IT Admin only.

Profile (/profile)

Your personal account page. View your role, department, unit, assigned permissions, and recent activity. You can update your information and change your password here. Available to all roles.

6. Requesting Access to a System

If you need access to a government system that is not currently available to you, you can submit a formal access request through the platform. The request will be reviewed and approved (or rejected) by your manager(s).

How to submit an access request:

Step 1 — Go to Self-Service

Click Self-Service in the sidebar (Arabic: الخدمة الذاتية الخدمة الذاتية).

Step 2 — Click "Request New Access"

Find the section labeled "Request New Access" and click the button.

Step 3 — Select the system

Choose the system you need from the dropdown. The available government systems are:

- HRMS — Human Resources Management System
- ERP-Finance — Financial Planning System
- DocuArch — Electronic Archiving System
- ContractMgr — Contracts Management System
- AuditTrail — Audit and Review System
- CitizenPortal — Citizen Services Portal
- SIEM — Security Information & Event Management
- MailGov — Official Government Email
- PayrollSys — Payroll System
- IAM-Platform — This platform itself

Step 4 — Choose the permission level

Read Only — you can view data but not make changes.

Read & Write — you can view and edit data.

Full Management — full administrative access to the system.

Step 5 — Submit the request

Click Send Request. Your manager will receive a notification to review it.

Step 6 — Track your request

Return to Self-Service at any time to check the status: Pending, Approved, or Rejected.

If rejected, you can view the reason and resubmit after addressing the issue.

INFO Who approves your request?

Most requests go through an approval chain of 1 or 2 people. Typically: your Department Manager first, then a Senior Manager for high-sensitivity systems. The platform assigns approvers automatically based on your department.

NOTE Requests for high-sensitivity systems (HRMS, ERP-Finance, PayrollSys, ContractMgr, SIEM, IAM-Platform) require approval from both a Department Manager and a Senior Manager.

Request priority levels:

Priority	When it is assigned	Expected turnaround
High	Contract extensions near expiry, account reactivation, critical role changes	1-3 business days
Medium	Standard access requests (most requests fall here)	5-7 business days
Low	Non-urgent, secondary system access requests	Up to 14 business days

7. Approving or Rejecting Requests (Managers)

If you are a Department Manager, Senior Manager, IT Admin, or System Owner, you will receive requests that need your approval. This section explains how to process them.

How to approve a request:

Step 1 — Go to Approval Requests

Click Approval Requests in the sidebar (Arabic: الطلبات المعلقة). You will see a badge showing the number of pending requests.

Step 2 — Find the request

Browse the list or use filters (priority, type, date). Click on a request to see its full details.

Step 3 — Review the details

Check who is requesting access, which system, and what permission level. Review any notes or justification provided.

Step 4 — Approve or Reject

To Approve: Click the green "Approve" button. A reason is optional.

To Reject: Click the red "Reject" button. A reason is required — the employee will see this reason and can resubmit.

To Delegate: Click "Delegate" to assign the request to another authorized manager for 3-30 days.

NOTE Important: If you are the first approver in a two-step chain, your approval does NOT complete the request. It moves on to the second approver. The request is fully approved only when all people in the chain have approved.

IMPORTANT When you reject a request, the rejection reason is mandatory. Write a clear reason so the employee understands what to fix before resubmitting.

8. Managing Your Profile

Every user can access their profile by clicking their name in the sidebar or navigating to /profile. Your profile shows:

- Your full name, email address, national ID, department, and unit
- Your current role and role label
- Account status (Active, Inactive, or Suspended)
- Date your account was created and your last login time
- All permissions currently assigned to you
- Recent activity on your account

Updating your profile:

Click the Edit button on your profile page. You can update basic personal information. Some fields (role, permissions) can only be changed by an IT Admin or System Owner.

Changing your password:

On your profile page, use the Change Password option. You will need to enter your current password and then your new password twice. Passwords must meet the platform's security requirements. If you have forgotten your password, contact your IT administrator.

IMPORTANT If your account is showing as Suspended on your profile, you cannot perform most actions. Contact your IT Admin or Security Officer to resolve this.

9. Contractors — Everything You Need to Know

For contractors (external staff):

Contractor accounts are special: they have an expiry date linked to your contract. When your contract expires, your account access is automatically limited. You must request an extension before this happens.

Checking your contract status:

Go to Self-Service → find the "My Contract & Access Duration" card. This shows:

- Contract start date
- Contract expiry date
- Days remaining (large countdown number)
- Percentage of contract elapsed (progress bar)

Color coding: Green = plenty of time, Amber = expires in 30 days, Red = expires in 7 days or less.

Requesting a contract extension:

1. Go to Self-Service.
2. Find the "My Contract" card and click "Request Extension".
3. Enter the new end date you are requesting.
4. Write a clear reason for the extension.
5. Submit — the request goes to your sponsor manager and then the System Owner for approval.

IMPORTANT Submit your extension request at least 2 weeks before your contract expires. Extensions require approval from 2 people and may take several business days.

For managers overseeing contractors:

The Contractors page (/contractors) gives you a full view of all external staff. You will see automatic warnings when a contractor's contract is about to expire. From this page you can extend a contract or terminate it. You can also view which government systems each contractor has access to.

Current contractor accounts:

Name	Email	Department	Contract Expiry	Status
Waseem Yasser Al-Sheikh	waseem.sheikh@homs.gov.sy	IT – Systems Development	2026-06-30	Active (expiring)
Hanan Riad Al-Ahmad	hanan.ahmad@homs.gov.sy	Archiving – Digitization	2026-08-31	Active

10. Notifications

The bell icon in the top-right corner of every page shows your notifications. A red badge displays the number of unread notifications. Click the bell to open the notification panel.

Notification Type	Icon Color	When you receive it
Approval required	Green (primary)	A new request is waiting for your approval
Contractor alert	Amber	A contractor's contract is expiring within 30 days
Security alert	Red	Suspicious activity detected — failed logins, blocked IPs, suspended accounts
System notification	Gray	General platform information and updates

You can mark individual notifications as read by clicking them, or mark all as read using the "Mark All as Read" button at the top of the panel. Up to 10 notifications are shown at a time.

11. Frequently Asked Questions (FAQ)

Q: I forgot my password. What should I do?

A: On the login page, click "Forgot Password". If this option is not available, contact your IT Administrator or submit a request through your department manager. Your IT Admin can reset your password from the User Management page.

Q: I entered the correct password but cannot log in.

A: There are a few possible reasons: (1) Your account may be suspended — contact your IT Admin or Security Officer. (2) Your account may be inactive — this happens when an employee's service ends. (3) You may be logging in from an unrecognized IP address — this is blocked as a security measure. Contact your IT Admin.

Q: Why does the sidebar show fewer pages than my colleague's?

A: The sidebar only shows pages your role permits you to access. If you believe you are missing a page you need for your work, submit an access request through Self-Service or ask your manager.

Q: Can I log in on my mobile phone?

A: Yes. The platform is responsive and works on mobile browsers (Chrome, Safari). The sidebar will appear as a slide-out drawer on smaller screens — tap the menu icon (top-left) to open it.

Q: How long does it take for my access request to be approved?

A: Standard requests (medium priority) typically take 5-7 business days. Urgent requests (high priority) are usually processed within 1-3 business days. If your request is taking longer, follow up with your direct manager.

Q: My access request was rejected. What do I do?

A: Go to Self-Service and find your rejected request. Click on it to see the rejection reason written by your manager. Address the issue, then click "Resubmit" to send it again.

Q: I need access to a system urgently. Can I speed up the process?

A: When submitting your request, the system assigns a priority automatically. To escalate, ask your Department Manager to approve it quickly. If it is truly urgent, your manager can flag it as High priority.

Q: Can I request access to multiple systems at once?

A: Currently, each request covers one system. Submit separate requests for each system you need access to.

Q: I want to see exactly which permissions I have. Where do I look?

A: Go to Profile (your name in the sidebar). The profile page lists all your current permissions. You can also click on your name from the User Management page if you have access.

Q: My role seems wrong. Who can change it?

A: Only an IT Admin or System Owner can change your role. Contact your IT department and explain what role you should have. You can also ask your HR manager to initiate a role change request.

Q: What is the difference between "suspended" and "inactive"?

A: Suspended means your account was temporarily blocked, usually due to a security review. You cannot log in but the account exists. Contact the Security Officer or IT Admin.
Inactive means the account is ended, usually when an employee's service contract terminates. This is done by HR during offboarding.

Q: My contract is expiring soon. What should I do?

A: Go to Self-Service and check your contract card. Click "Request Extension", enter the new proposed end date and a justification. Do this at least 2 weeks before expiry — the request needs 2 approvals.

Q: I am a contractor. Which systems can I access?

A: Your accessible systems are shown on the Self-Service page under "My Current Access". If you need access to an additional system, submit an access request. Note: contractors have limited default permissions for security reasons.

Q: What happens if my contract expires without an extension?

A: Your account permissions will be limited automatically. You will still be able to log in briefly to submit an extension request, but you will not be able to use the connected government systems until the extension is approved.

Q: I approved a request but the employee says it is still pending.

A: Some requests require approval from 2 people (a two-step chain). Your approval was the first step — the request is now waiting for the second approver. Check the request details to see who else needs to approve it.

Q: How do I delegate a request I cannot handle right now?

A: On the Approval Requests page, open the request and click "Delegate". Select another authorized manager and choose the delegation period (3 to 30 days). The selected manager will receive a notification.

Q: How do I suspend a user account?

A: Go to User Management (/users), click on the employee's name, then click "Suspend Account". This requires the users:suspend permission (IT Admin, Security Officer, System Owner).

Q: Who can see what I do on the platform?

A: All your actions are recorded in the Audit Log. This includes logins, logouts, requests submitted, and profile changes. The Audit Log is visible to: System Owner, IT Admin, Security Officer, and Internal Auditor. It cannot be modified or deleted by anyone.

Q: Can the audit log be exported?

A: Yes. Users with the audit:export permission (System Owner, IT Admin, Security Officer, Internal Auditor) can export the log as CSV or Excel. Individual rows can be selected for a partial export.

Q: The platform looks different from what a colleague described. Why?

A: Different roles see a different interface. A Regular Employee sees only the Self-Service portal and Profile. An IT Admin sees the full management suite. The platform adapts based on your role.

Q: Can I switch between light and dark mode?

A: Yes. Click the moon/sun icon in the top-right header to toggle between light mode (day) and dark mode (night).

Q: What is the "Demo Mode" banner I see at the top of the page?

A: You are logged in as a demo account (usually via the "Demo Login" button on the login page). All data you see is simulated — no real government data is affected. To exit demo mode, log out and log in with your real credentials.

12. Troubleshooting & Common Errors

Issue: "Your account is suspended" error when logging in

Solution: Your account has been suspended by a Security Officer or IT Admin, usually due to a security review. Contact your IT department immediately. Do not attempt repeated logins as this may extend the lock.

Issue: "Incorrect password" — but I am sure it is correct

Solution: Passwords are case-sensitive. Make sure Caps Lock is off. If it still fails, use the Forgot Password link or contact IT Admin for a reset. After 3 failed attempts, your account may be temporarily locked.

Issue: Login blocked — "access from unrecognized IP address"

Solution: The platform blocks logins from unknown IP addresses for security. This usually happens when connecting from outside the office network or via VPN. Contact your IT Admin to whitelist your IP or resolve the access issue.

Issue: I submitted a request but it disappeared

Solution: Requests do not disappear — check your Self-Service page under "My Requests". If you just submitted it, it should show status "Pending". If you truly cannot find it, it may have been automatically archived or there was a submission error — try submitting again.

Issue: The page shows "403 Forbidden" or "Access Denied"

Solution: You are trying to access a page that your role does not permit. This is normal — do not attempt to access restricted pages directly via URL. If you believe you should have access, contact your IT Admin or submit an access request.

Issue: The sidebar menu collapsed and I cannot expand it

Solution: There is a small arrow/chevron button at the top of the collapsed sidebar. Click it to expand. On mobile, tap the hamburger menu icon (≡) in the top header.

Issue: Notifications are not showing

Solution: Try refreshing the page (F5 or Ctrl+R). If the bell icon shows "0" but you expect notifications, all current notifications may already be marked as read.

Issue: My contract extension request was not submitted

Solution: Make sure you filled in both the new end date AND the reason fields — both are required. If the issue persists, contact your IT Admin.

13. Glossary

Term	Definition
IAM	Identity and Access Management — the system that controls who can access what.

Term	Definition
Role	A job-based label assigned to each user that determines their permissions (e.g. "Department Manager").
Permission	A specific action a user is allowed to perform (e.g. "users:create", "audit:view").
Access Request	A formal request submitted by an employee to gain access to a specific system.
Approval Chain	The ordered list of managers who must approve a request before it is granted.
Workflow	The process a request goes through from submission to final approval or rejection.
Audit Log	A permanent, tamper-proof record of all actions taken on the platform.
Suspended Account	An account temporarily blocked by an admin, usually for security reasons.
Inactive Account	An account deactivated because the employee's service has ended.
Contractor	An external (non-government) employee with temporary, time-limited access.
Contract Expiry	The date on which a contractor's access authorization ends.
Delegate	To temporarily hand off an approval task to another authorized manager.
Demo Mode	A testing mode using simulated data — no real government data is affected.
RTL	Right-to-Left — the text direction for Arabic. The platform supports both Arabic and English.
Dashboard	The main home page showing statistics and overview information after login.
Self-Service	The portal where employees manage their own access needs without IT involvement.
Sponsor	The government employee responsible for a contractor's access and activities.
LDAP/AD	Lightweight Directory Access Protocol / Active Directory — directory service for centralized authentication.
@homs.gov.sy	The official email domain for all Homs Governorate employees. Used as your username.

For technical support, contact the IT Department: it-support@homs.gov.sy

Homs Governorate — Identity & Access Management Platform — User Guide v1.0
